

Rubb Buildings Sports Design is Perfect Goal

Rubb Buildings has delivered another winning Sport's building to Erins Own Lavey GAC in Gulladuff, Northern Ireland.

This special BVE Sports Hall with 35m span x 60m long Sports Hall, including high volume inner walls, is yet another project to continue Rubb Buildings' reputation for providing outstanding sporting solutions.

The backbone of a Rubb building is a well engineered structural framing system. Post production hot dip galvanizing of all welded components provides the best corrosion protection in the industry with the truss frame construction creating the platform for the clear span and high volume walls. The use of white semi translucent roof fabric provides a light, bright airy atmosphere to the building. All services are fully integrated with lighting, ventilation and the dehumidification system providing the perfect sports environment, with the benefit for sports activities 52 weeks of the year.

Working closely with McGurk Chartered Architects, the Sports Hall (partly funded by Sport N.I.) had to deliver the best environment for Gaelic Football, Hurling and Camogie competitions.

Sean McGiven of McGurk of Belfast, said "This is the first time we have worked with

Rubb Buildings. They impressed us with their ability to change their build systems to give us the design specification we had promised our client. Without doubt the best result.”

The Rubb Organisation, with over 40 years experience and with production facilities in Great Britain, Norway and the United States, is recognized as a world leader in the design, development and manufacture of permanent or relocatable build structures and is quality certified to ISO9001:2000.
