

PRESS RELEASE

BVR Type Storage Facility for Metro Ports, Long Beach, California USA

Sanford, Maine – Metro Port was looking for a small structure that could be relocated with a crane around its site. The structure was designed and manufactured with multiple custom openings which allow the usage of a specialized conveyor system to load bulk material.

The building is a BVR Type structure and measures 30ft x 30ft with a 20ft sidewall and can sustain a live load of 12 psf, and a 3 second gust wind speed of 85 mph with a 3 lb. collateral load.
